EDUCATION

Carnegie Mellon University, Integrated Innovation Institute — Expected December 2027
Master of Integrated Innovation for Products & Services
GPA: 3.87 — Pittsburgh, PA

University of Colorado Boulder — May 2026
Bachelor of Science in Creative Technology and Design — Boulder, CO
GPA: 3.85
Dean's List (7/8) | Chancellor's Achievement Scholarship (8/8)

WORK EXPERIENCE

INTERFACE DIVISION — August 2026 - Present
Data Analyst | Behavioral & Marketing Analytics — Remote

- Utilize Google Tag Manager (GTM) and Google Analytics 4 (GA4) to support client tracking and reporting setups.
- Support projects including Klaviyo marketing automation (MA) proof-of-concepts, Static Spark data analysis, and bespoke data warehousing initiatives.
- Contribute to custom analytics and data infrastructure projects across a client portfolio.

THINKware — June 2022 – July 2022 | January 2023 - July 2026
Data Analyst | Technology Consulting for The Larkin Company — Remote

- Developed clear SQL reports that delivered actionable insights to clients and improve operational efficiency.
- Onboarded and trained interns, delegated tasks, and resolved issues to ensure team productivity.
- Collaborated with teams to analyze data, identify issues, and design effective reporting solutions.
- Maintained and updated reports to ensure clients receive accurate, current data.
- Led a team of interns to migrate over 155 external and 28 internal reports from Sisense to AWS QuickSight, organizing and distributing workload while writing SQL to convert static Elasticube models into live data models.
- Built a yearly report summary product from scratch, writing SQL to calculate statistics, storing results in a database, and developing a webpage that automatically ingests the data to produce interactive reports and downloadable PowerPoint decks — reducing production of 150+ reports from one quarter of work by two experienced CSMs to under 2 minutes.

ASENION (Formerly Fairly AI) — May 2025 – August 2025
AI Research Intern | AI Governance — Remote

- Conducted comprehensive research and testing on hallucinations, false assertions, and PII in AI models, developing Apps Script to analyze 1000+ data points across 10+ industry-leading models.
- Conducted QA on enhanced Garak LLM vulnerability probes throughout the development-to-production pipeline.
- Updated policy documentation to align with industry standards and company guidelines.

UNIVERSITY OF COLORADO BOULDER — August 2025 – May 2026
Course Assistant | Integrated Design Engineering Department — Boulder, CO

- Assisted in GEEN 1400 First-Year Engineering Projects under Professor Joany Tisdale.
- Collaborated with student teams to support project development and learning objectives.
- Guided students through design solutions, fabrication techniques, and project implementation.
- Connected students with relevant resources and technical expertise.
- Assisted in grading presentations, reports, and assignments to provide constructive feedback.

PROJECT EXPERIENCE

MEASURELY: ASSISTIVE BAKING DEVICE | UNDERGRADUATE CAPSTONE — August 2025 - May 2026
Electronics, Engineering & Mechanics — Boulder, CO

- Managed full electronics integration: circuit planning, pin mapping, power management, and wiring optimization across 12+ digital pins and 4 motor drivers.
- Designed and validated engagement mechanism with electrical feedback, eliminating need for mechanical precision in component positioning.
- Developed Arduino firmware for multi-subsystem control: stepper motors, load cells, linear actuators, and NeoPixel arrays with real-time sensor feedback.
- Iterated CAD enclosure design through testing cycles, resolving tolerances and structural failures through measured reinforcement.

MICROGREEN GROW CABINET | TEAM PROJECT August 2025 - December 2025

Electronics Lead, Software Development & System Integration Boulder, CO

- Designed and implemented Arduino-based environmental control system managing moisture, irrigation, lighting, and ventilation across 3 independent growth chambers.
- Integrated soil moisture sensors with automated watering logic; validated system stability through field testing.
- Created technical documentation including circuit schematics, assembly procedures, and a 30-component bill of materials.

SKILLS

- **Languages:** SQL, Python, Arduino, Swift, Java, HTML/CSS, C#
- **Analytics & Marketing Tools:** Google Analytics 4 (GA4), Google Tag Manager (GTM), Google Data Studio
- **Design & CAD**: Figma, Rhino, OnShape, SketchUp, Adobe Photoshop, Illustrator, InDesign, Lightroom
- **Fabrication & Hardware:** Arduino, electronics/hardware design, soldering, laser cutting, enclosure design, 3D printing, woodworking
